

2014 SUSTAINABILITY AT A GLANCE

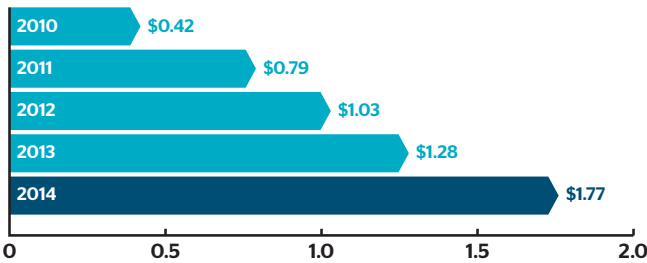

Our company

Sustainability begins with building a strong financial and cultural foundation for responsible and profitable growth.

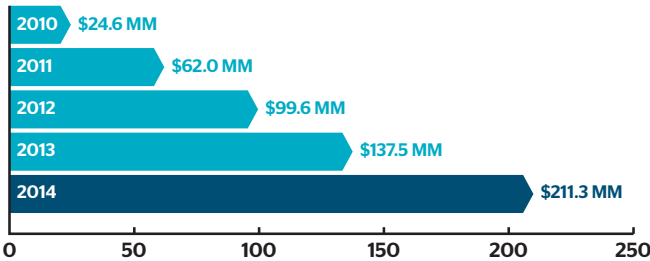

Our **financial strength** forms the foundation for sustainability at SECURE.

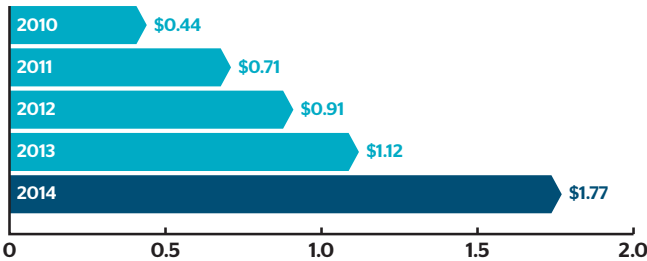

Adjusted EBITDA per basic share - **CAGR 43%**

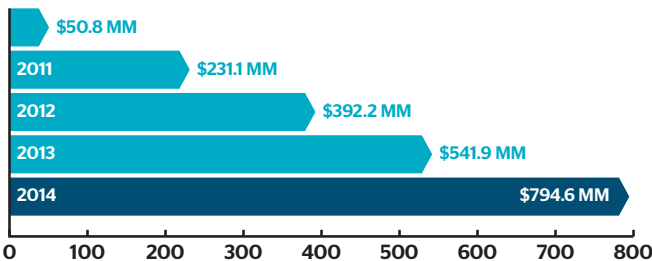

Adjusted EBITDA - **CAGR 71%**

Funds from operations per basic share - **CAGR 42%**

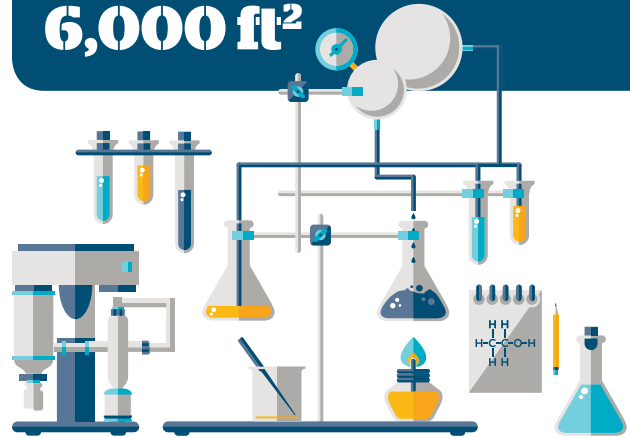

Revenue (Excludes oil purchase and resale) - **CAGR 99%**

CAGR: Compound Annual Growth Rate

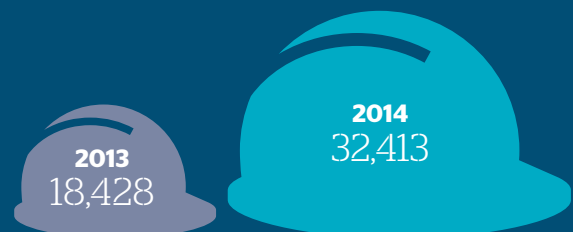

Western Canada's Largest
OILFIELD LAB
6,000 ft²

8 PHDS 11 CHEMISTS

Creating a continuous flow of drilling and completion fluid innovations that **improve efficiencies and reduce the environmental impact.**

Proactive Safety Efforts

Further improving our safety culture with a behavior-based safety program that focuses on proactive efforts (*safety meetings, audits, training*).

» Our industry

In addition to our internal practices and culture, SECURE is in the business of helping our customers operate in a more sustainable way.

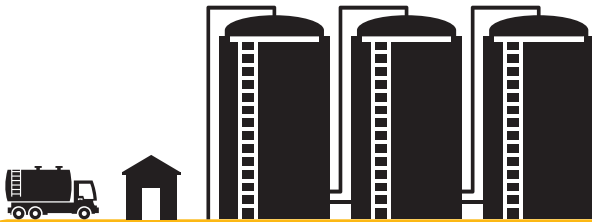

> 200

PIPELINE INTEGRITY DIGS

Proactively prevented spills by conducting over 200 pipeline integrity digs to inspect over 4,000 meters of pipeline for our customers.

Commenced testing of a technology that **recovers hydrocarbons** from drilling cuttings to further increase the amount of oil recovered from oilfield waste.

> 3,000,000 m³

Safely managed over 3 million cubic metres of oilfield fluids and solids using our 35 state-of-the-art processing, recovery and disposal facilities.

> 2.5 million kms of truck hauling avoided

Through the use of high-tech pumping and transfer equipment offered as part of our Integrated Fluid Solutions, we avoided 2,500,000 kilometers of water hauling by truck.

Our **OnSite Division** helped our customers reclaim **over 130 acres of land**.

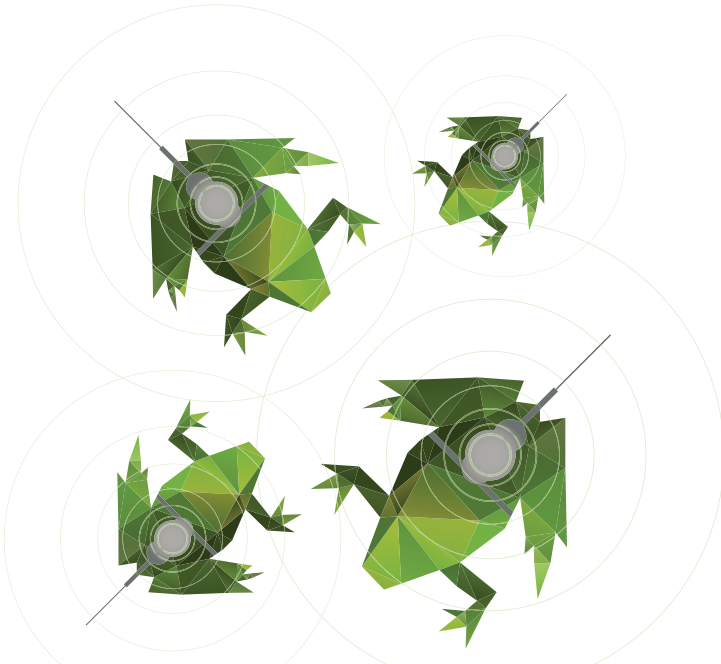

Recycling & Repurposing fluids for hydraulic fracturing

Developed technology that has the potential to reduce industry's demand for millions of liters of fresh water by recycling and repurposing fluids for hydraulic fracturing.

» Our community

..... Beyond our company and industry, we take responsibility
..... for helping to enrich the communities we serve.

Initiated a joint research project after discovering
40,000 TADPOLES
in a run-off pond at our **Fox Creek Landfill site**.

Collaborated with the University of Alberta to protect and enhance the Western Toad population - a sensitive species in Alberta.

.....
The desire to give back is ingrained in the SECURE culture and our contributions take many forms including charitable giving, sponsorships and employee volunteerism.
.....

SECURE Energy Services donated

\$500,000

to charitable causes throughout 2014

Looking ahead: We will continue to embed a mindset of sustainability throughout our operations and look forward to sharing the results of exciting innovations in recycling and recovery.
